BMW M3 Saloon

BMW M4 Coupé

BMW M4 Competition Convertible with M xDrive

All dimensions in the technical drawing are given in millimetres. The figures for performance, fuel consumption and CO₂ emissions refer to vehicles with standard transmission.

¹ The EC unladen weight refers to a vehicle with standard equipment and does not include any optional extras. The unladen weight includes a 90% full tank and a driver weight of 75 kg. Optional equipment may affect the weight of the vehicle, the payload and the top speed if the selected equipment has an impact on the vehicle's aerodynamics.

² Performance data of petrol engines apply to vehicles using RON 98 fuel. Fuel consumption data apply to vehicles using reference fuels in accordance with EU Regulation 2007/715. Unleaded RON 91 and higher with a maximum ethanol content of 10% (E10) may also be used. BMW recommends RON 98 super plus unleaded petrol.

³ Official data for fuel consumption and carbon dioxide emissions was determined in accordance with and complies to the measuring procedures as defined by European Regulation (EU) 715/2007 in the applicable version. In the event of ranges, data determined as per WLTP takes into account any optional equipment (available on the German market in this case). For vehicles that have been newly type approved since 1 January 2021, only the official data according to WLTP exist. For more information about NEDC and WLTP measuring procedures visit www.bmw.com/wltp

⁴ Electronically limited.

⁵ The raised top speed is only available after the first service following the 2,000 km run-in period.
